

# UNLOADER ONE®

The Unloader One® OA Knee Brace uses dual Dynamic Force Straps (DFS) to apply a gentle force designed to reduce pressure on the sensitive bony surfaces of the knee, resulting in a reduction in pain and an increase in the wearer's mobility.

## THE 3 POINT LEVERAGE SYSTEM

## CLINICALLY PROVEN EFFICACY

Recent clinical research by the Steadman Philippon Research Institute demonstrated the following results for patients using the Unloader One knee brace:

### DECREASED KNEE PAIN

*For a more active life*

The support provided by the brace enables many users to take up activities they might have started to avoid because of the pain and stiffness caused by OA.

### IMPROVED FUNCTION

*Helping to avoid or postpone surgery*

For some patients, the Unloader One can mean surgery is no longer a necessity, as their mobility is increased and pain is reduced. For others, the brace is used as an interim solution, postponing the need for surgery until they feel both mentally and physically prepared for the procedure.

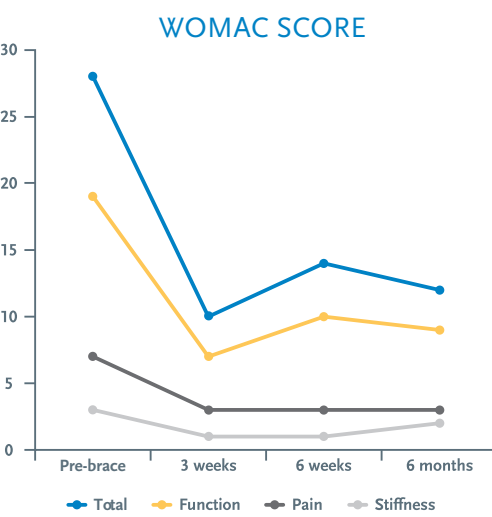

### REDUCED USAGE OF PAIN MEDICATION

*Avoiding unwanted side effects*

As pain decreases, with use of the Unloader One, so does reliance on painkillers. While they certainly have their uses, the stronger painkillers can have negative side-effects when used over extended periods of time.

### STATISTICAL OUTCOMES

Significant improvement was seen in the pain, stiffness, and function sub-components of the WOMAC score ( $p < 0.05$ ) from pre-brace to 6 months.

# ÖSSUR PRODUCT LINE OVERVIEW

## ÖSSUR ORTHOPAEDICS: A LINE WITHOUT LIMITATIONS

Össur is proud to offer one of the most comprehensive orthopaedic product lines. After establishing biomechanical expertise as a leader in prosthetic design, Össur has focused on serving the needs of clinicians with some of the most proven and respected designs in the industry, including: Unloader® One custom and off-the-shelf osteoarthritis knee braces, CTI® custom and off-the-shelf ligament knee braces, Equalizer® walker boots and Miami J® cervical collars.
